

The Pandemic Response

3M N95 Surgical Mask. 3M increased production of these masks in response to the demand from global healthcare systems.

Production:

- 3M brought N95 mask production up to 1.1B/year units worldwide in January of 2020 and plans to double production again to 2B/year within the next 12 months
- In the US alone production is expected to increase to 50M/month by June 2020
- In the US 90% of production has been designated specifically for the healthcare industry

Counterfeit and Profiteering

- 3M is working with law enforcement to combat resale of PPE
- 3M has pledged to not raise prices even with increasing demand for their products and made pricing publically available so consumers can make sound purchase decisions

Transparency and Information Bulletins

- 3M has released several bulletins informing healthcare workers and the general population about mask choices given individual use cases
